11/05/2025 – CURRENT
**Bonnier Bokklubb**

**Role – Senior Salesforce/Full-Stack Developer**

*Stockholm, Sweden*

Sweden's leading book club and publishing company under the Bonnier Group. Responsible for curating and marketing high-quality literature to a wide membership base. Supported operations in publishing, customer engagement, and digital content delivery.

Main responsibilities:
- Integrated Salesforce with core business systems, including:
  - Valitive for credit data validation
  - Klarna and Danske Bank for billing and payments
  - Alektum for debt collection
  - Speed for warehouse and logistics integration
  - PIM for product information management
  - Voicemal for call center operations
  - Microsoft Dynamics for ERP and business process synchronization
- Developed custom Lightning Web Components (LWC) to enhance the Salesforce user experience and streamline internal workflows.
- Contributed to the design and documentation of system integrations, including secure SFTP-based data exchanges with external partners and internal platforms.
- Contributed to the setup and maintenance of CI/CD pipelines, enabling faster and more reliable deployments.

Technical skills:

Java, Apex, LWC, JavaScript, CSS, HTML, Jira, GitHub Actions, CI/CD, Salesforce
